

JavaScript Style Guide

General Rules

- Use **Tabs** for indentations.
- Use **Single Quotation Marks** for strings.
- Have **Space** around operators
- End simple statements with a **Semicolon**.
- Do not **Add** a comma to the end of last property in objects and arrays.

Naming Rules

- Use **Camel Case**, for IDs, Variables, and function names.
- Have **Efficient** and **Well Described** names.
- Do not have **One Letter** names.
- Do not use **\$** in front of names, as this is reserved for jQuery elements.
- Include a **Space** between the function name and parameter brackets.

Complex Statement Rules

- Put the opening bracket at the **End of first line**.
- Put the closing bracket on a **New Line Without Leading Spaces**.
